M E M O R A N D U M

ST. CLAIR COUNTY - Solid Waste Disposal  
Sauget/Paul Sauget

TO: C. W. Klassen, Director  
Environmental Protection Agency

FROM: Region II

DATE OF INSPECTION: July 29, 1970

INTERVIEWED: Jim Linsey, Operator  
Wiley Scott, Site Caretaker

On the above date, an inspection of the above named solid waste disposal site was conducted by Sanitary Inspector Richard L. Ballard. This inspection revealed the following:

1. Adequate daily cover of all refuse is not being provided. The entire face of the fill area is exposed. This fill face is approximately 100 yards long and 10 feet high. This refuse consists of all types of household and some commercial and industrial waste.
2. The completed portions of the fill have not received the required final cover. This area consists of approximately five (5) acres and is bordered on the north by the site entrance at Riverview Avenue, on the east by a levee and the GM & O R.R. tracks, on the west by the Monsanto property and the Union Electric fly ash pond. The fill face is at the south end of the site. The grade of this finished area is level with the surrounding area.

The operation of this site has been poor to marginal since it was registered in March, 1967. A letter will be sent to Mr. Paul Sauget, stating that daily cover must be provided immediately and that provisions must be made to provide the final cover for all completed portions of the fill.

This report is submitted for your information.
